Official training set
60,000 images
Seed-42 stratified split
54,000 train / 6,000 val
Official test set
10,000 images
Held out until evaluation
Fit mean and SD on training only
Reuse on all three partitions
Choose one representation
vector / grid / rows / patches
One independent model per run
Ten class logits
Cross-entropy + Adam
Training images only
Validate after each epoch
Keep lowest validation loss
No gradient updates on validation
Freeze selected weights
Evaluate official test set
Metrics, errors and timing
